EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Roland Long on 7/20/2010.
3. The application has been amended as follows:

In line 3 of claims 1 and 16, "pool filter, a swimming pool cleaning device" has been changed to --pool filter and a swimming pool cleaning device--.

In line 4 of claim 14, "a cleaning device for swimming pool" should be changed to --a cleaning device for the swimming pool--.

Claim 7 has been amended to now read:

7. The combination according to claim 6, wherein, ~~the assembly formed by the meter;~~ the external housing includes a high-pressure pump body comprising the second pump impeller, and a low-pressure pump body comprising the first pump impeller; and wherein the high-pressure pump body is coupled via a releasable connection to the low-

~~pressure pump body, the two pump impellers and the high pressure pump body is connected in a releasable manner to the body of the low pressure pump.~~

Claim 8 has been amended to now read:

8. The combination according to claim 7, wherein, ~~the said~~ releasable connection ~~between said assembly and the low pressure pump body~~ is carried out by means of bayonet-type locking.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose first and second impellers at opposite axial ends of an electric motor; further comprising the first impeller operating at a low pressure and high flow rate and having a first outlet and a second outlet to an exterior of the pump, and the second pump impeller operating at a higher pressure and lower flow rate as compared to the first impeller and having an inlet and a first outlet to the exterior of the pump; wherein the first outlet of the first impeller is connected to the inlet of the second impeller and delivers low pressure water to the inlet of the of the second impeller so that the water flows from a region of low pressure toward a region of higher pressure, wherein the second outlet of the first impeller and the first outlet of the second impeller are separate outlets to the exterior of the pump, wherein the second outlet of the first impeller is connected to an inlet of the filter, and wherein the first outlet of the second impeller is connected to an inlet of the cleaning device.

5. It is noted by the examiner, and stated here for the record of prosecution, that the aspect of the instant invention determined to be novel and patentably distinct from the prior art is the first outlet of the first impeller being connected to the inlet of the second impeller and delivering low pressure water to the inlet of the of the second impeller so that the water flows from a region of low pressure toward a region of higher pressure; wherein the second outlet of the first impeller and the first outlet of the second impeller are separate outlets to the exterior of the pump, wherein the second outlet of the first impeller is connected to an inlet of the filter, and wherein the first outlet of the second impeller is connected to an inlet of the cleaning device. These limitations in combination with the first and second impellers being at opposite axial ends of an electric motor, wherein the first impeller operates at a low pressure and high flow rate and has a first outlet and a second outlet to an exterior of the pump and wherein the second pump impeller operates at a higher pressure and lower flow rate as compared to the first impeller and has an inlet and a first outlet to the exterior of the pump, make the claim read over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PETER J. BERTHEAUD whose telephone number is (571)272-3476. The examiner can normally be reached on M-F 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Devon Kramer can be reached on (571) 272-7118. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
